Georgia SoftWorks, developer of the GSW Telnet Server for Windows and SSH Server for Windows welcomes Malcolm Garstin to its Support Team. Garstin will be working with system administration and tech support, as well as other areas. He has worked in the IT/System Engineering field for over 10 years. Garstin has experience in network support/design, server management and client technical management.

"Malcolm's skill set will be a great addition to the Georgia SoftWorks' team. He brings to the table a level knowledge and experience, for which Georgia SoftWorks is well known," said Doug Hitchcock of Georgia SoftWorks.
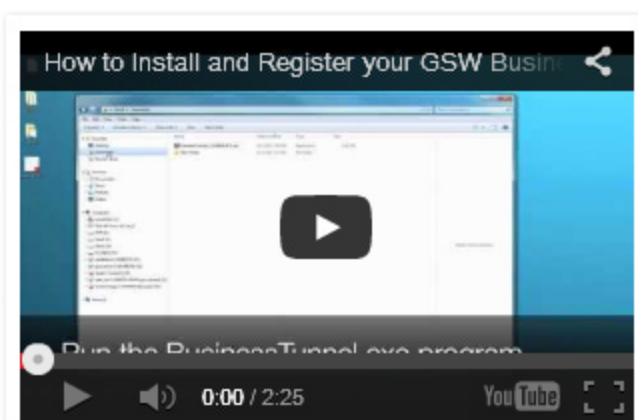

Garstin brings a variety of skills that will be an asset to the Georgia SoftWorks Team. He is fluent with Windows servers, active directory, VMware, imaging, network security, hardware troubleshooting and more. He most recently was a Field Engineer, providing assistance for everything from server administration to application support and more.

"Georgia SoftWorks is an innovative company and I am proud to be with the team and excited to embrace the challenges and goals the company has set for me," said Garstin.

Georgia SoftWorks is a software development company located in Dawsonville, GA (USA) and has received global recognition for its development of the industrial grade GSW Telnet Server for Windows and SSH Server for Windows. The GSW software is used in thousands of data collection environments around the world and has end users and resellers on every continent except Antarctica. GSW software is used in almost every industry, including automobile factories, airlines, soft drink manufactures, pharmaceutical companies and more.

About Georgia SoftWorks:
Established in 1991, Georgia SoftWorks is a privately held software development company recognized for creating high performance data communications, system and telecommunications applications. Georgia SoftWorks has obtained a worldwide presence with its industrial SSH2/Telnet Server for Microsoft Windows. GSW's long-term commitment to SSH2/Telnet has led to the pioneering of major features such as Session Shadowing, Session Monitoring, Graceful Termination, Automatic Logon, Logon Scripting and more recently Team Services technology which allows mobile device users to transfer, swap, share and recover mobile device sessions. GSW has also provided the very first SSH Server to provide Digital Certificate Authentication with an Internet Information Server (IIS) like certificate-to-user account mapping. This includes 'One-to-one' and 'Many-to-one' mapping methods and also supports certificate trust lists (CTL).

How to Install and Register your GSW Busin...

Run the BusinessTunnel.exe program
