

Intesys S.C. to Resell GSW Telnet Server for Windows in Poland

This month Georgia SoftWorks (GSW) welcomes Poland's Intesys S.C. to its ever growing network of global resellers. Intesys S.C. focuses on creating and developing applications specifically to support trade and logistics and this is where the GSW [Telnet Server for Windows](#) and SSH Server for Windows are a perfect fit providing industrial quality, security and performance required in RF and mobile device environments. GSW has a wide reaching international presence and continues to expand as new markets emerge.

Georgia SoftWorks, maker of the GSW Telnet Server for Windows and SSH Server for Windows, is pleased to introduce a new reseller in Poland.

Intesys S.C. provides software solutions that optimize inventory management, purchasing, sales on the internet or in a store. Additionally, their software boosts warehouse productivity by 25% and increases the value of transport.

"Especially in today's global market, quality Authorized Resellers are a win-win-win arrangement. The customers can interact with local merchants, the reseller can provide the best industrial quality Telnet and SSH Server and GSW gains access to areas that otherwise would be quite difficult due to language and distance barriers," said Diane Sexton of Georgia SoftWorks. "We are pleased to have [Intesys S.C.](#) providing the GSW Windows Telnet and Windows SSH Server solutions."

The GSW Telnet Server is excellent with mobile devices, RF terminals, Bar Code scanners and other data collection devices in wireless environments. Additionally the RF wireless hand held application developer is able to create more generalized applications that will easily work with a variety of manufactures' hardware making it an excellent complement to the solutions offered by Intesys S.C. for small, medium and large commercial and manufacturing companies. Not only is there a development and maintenance cost savings, this added flexibility allows customers to utilize existing hardware in heterogeneous environments.

Established in 1991, [Georgia SoftWorks](#) is a privately held software development company recognized for creating high performance data communications, system and telecommunications applications. Georgia SoftWorks has obtained a worldwide presence with its industrial SSH2/Telnet Server for Microsoft Windows. GSW's long-term commitment to SSH2/Telnet has led to the pioneering of major features such as Session Shadowing, Session Monitoring, Graceful Termination, Automatic Logon, Logon Scripting, Team Services technology which allows mobile device users to transfer, swap, share and recover mobile device sessions and most recently Digital Certificate Based Authentication.
